

# Europe's Crop Apartheid

Here are the facts about the EU's proposed Ban on Palm Oil under the Renewable Energy Directive:

1. The European Parliament has voted to Ban Palm Oil biofuels.
2. The EU Commission claims "*excluding biofuels produced from Palm Oil from being accounted*" under RED is not a Ban.
3. The EU Commission wants you to think the Ban is a "Subsidy Cap" post-2021. This is patronising. Malaysia's small farmers are not foolish – we know a Ban when we see one.
4. The "Subsidy Cap" means exclusion for Malaysia's Palm Oil farmers. European oilseeds will not be excluded. This is the very definition of discrimination.
5. EU leaders attack American tariffs but now seek to impose discriminatory tariff-like measures on Malaysian exports.
6. Approving a Ban on Palm Oil biofuels will signal Europe is abandoning its WTO commitments and withdrawing from Asia.

**A Ban is a Ban. Malaysian Small Farmers Reject  
All Unequal Treatment for Palm Oil.**
